RABQSA International Expands the Management System Certification Body Scheme to include ISO/Management System Scopes

Milwaukee, Sydney and Athens - RABQSA International (RABQSA) has today announced the expansion of the RABQSA Management System Certification Body (MSCB) Auditor Certification Scheme designed specifically for auditors engaged by accredited management system certification bodies.

The scheme initially identified IAF, ISO, and Industry Scopes, as appropriate to each grade of certification. RABQSA is pleased to advise that the ISO/Management Scopes are now completed and available for certification.

The development of the IAF and Industry Scopes will be finalized in 2008.

The expansion of the RABQSA MSCB auditor certification scheme, with specific ISO/Management System Scopes designed for the accredited certification community, will complement RABQSA's existing international profile around the world.

For further information relating to the above revisions or related certification requirements specific to RABQSA's personnel certification schemes, please contact your regional RABQSA Office, or email to info@rabqsa.com.
