

Competency	Performance Criteria	Evidence Guide
<p>1. Understand the application of the principles, procedures and techniques of cleaning and disinfecting</p>	<p>1.1 Relevant terminology is understood 1.2 Selection and application of appropriate cleaning and disinfecting methods 1.3 Application of cleaning and disinfection related to surface and material properties 1.4 Usage of appropriate equipment</p>	<p>Relevant terminology for cleaning and disinfecting is used. Appropriate selection and application of cleaning and disinfecting methods are described. Application of cleaning and disinfection related to surface and material properties is described. Appropriate selection and usage of equipment is described.</p>
<p>2. Understand the basic chemistry related to cleaning agents</p>	<p>2.1 Selection of appropriate cleaning agents 2.2 Understanding chemical labelling related to cleaning agents 2.3 Application of appropriate dosing and mixing</p>	<p>Appropriate cleaning agents for specific situations are defined. Chemical labelling related to cleaning agents is described. Appropriate dosing and methods for mixing cleaning agents are described.</p>
<p>3. Understand the basic microbiology related to disinfecting agents</p>	<p>3.1 Selection of appropriate disinfecting agents 3.2 Understanding labelling related to cleaning agents 3.3 Application of appropriate dosing and mixing</p>	<p>Appropriate disinfecting agents for specific situations are defined. Chemical labelling related to disinfecting agents is described. Appropriate dosing and methods for mixing disinfecting agents are described.</p>

Competency	Performance Criteria	Evidence Guide
<p>4. Understand the health and safety precautions to be undertaken when using cleaning/disinfecting agents</p>	<p>4.1 Understanding labelling related to health and safety on cleaning and disinfecting agents</p> <p>4.2 Usage of appropriate protecting clothing and instrumentation</p> <p>4.3 Basic understanding of First-Aid actions related to non-appropriate usage of cleaning and disinfecting agents</p>	<p>Labelling related to health and safety on cleaning and disinfecting agents is read and requirements described.</p> <p>Appropriate protecting clothing and instrumentation for specific situations are described.</p> <p>Basic First-Aid actions related to non-appropriate usage of cleaning and disinfecting agents are described.</p>
<p>5. Understand basic waste management principles</p>	<p>5.1 Understanding labelling related to environmental protection on cleaning and disinfecting agents</p> <p>5.2 Categories of different wastes</p> <p>5.3 Methods of handling different wastes</p> <p>5.4 Waste management methods and practices</p>	<p>Ability to read and understand labelling related to environmental protection on cleaning and disinfecting agents is demonstrated.</p> <p>Different categories of waste are defined.</p> <p>Appropriate methods of handling different wastes are described.</p> <p>Appropriate methods of waste management are described.</p>
<p>6. Understand the proper use of equipment and cleaners to avoid harming floors, fixtures, and themselves</p>	<p>6.1 Working with different equipment</p> <p>6.2 Proper use and basic maintenance</p> <p>6.3 Good cleaning practices</p>	<p>Appropriate selection of common cleaning and disinfecting equipment in different situations is described.</p> <p>Methods for safe and effective operation of common cleaning and disinfecting equipment are described.</p> <p>Basic methods of maintenance of common cleaning and disinfecting equipment are described.</p>
